

South Western Sydney Local Health District - Our Board Communique

Introducing the SWSLHD Board's Finance & Assets Committee

The District's ability to provide safe, high-quality care and meet the needs of our community is supported by sound financial management and the consistent delivery of high-quality corporate services.

The Committee monitors and provides advice on issues concerning financial performance, sustainability, capital works and asset management, and information communication and technology.

The Committee reviews the efficiency and effectiveness of our District in delivering its strategic objectives and in meeting accountabilities set out in the Annual Service Agreement.

Finance & Assets Committee
Chair, John Roach

SWSLHD's Board Committees:

How the Finance & Assets Committee supports your work

Finance and Performance

The Committee provides oversight of the District's budget, ensuring we deploy our resources efficiently and sustainably to support service delivery and meet the needs of our community. This oversight includes ensuring that services are delivered within our budget while delivering safe, high-quality care to the community.

Sustainability

We must ensure the long-term sustainability of the healthcare system. Service delivery, resource management, value-based healthcare and innovative service solutions all contribute to the District's ongoing financial sustainability. We consider the environmental footprint we create and the impact of the climate on the health of the community.

Capital Works and Asset Management

Our District has more than \$3 billion in redevelopments in progress, as well as local projects and programs of repairs and maintenance. The Finance and Assets Committee oversees this activity, ensuring our projects deliver strong value for our people.

Information, Communication and Technology

Digital integration is a vital part of building the healthcare system of the future. The Committee oversees the ICT Department and supports them as they embed a digitally enabled healthcare system.
